

KSi Model 1208 / 1610 Seed and Bin Fill Conveyors

KSi Model 1208 and 1610 flagship conveyors feature KSi's original patented, cleated belt technology that revolutionized the belt conveyor industry.

KSi developed a patented, cleated belt technology that outperforms conventional augers and conveyors, moving seed more efficiently at steeper angles with very little material damage.

- 12"/16" patented cleated belt with 8"/10" galvanized tube construction
- Complete enclosed return
- Electric, PTO, or hydraulic drive
- Patented top-drive configuration
- Cable lift or hydraulic lift
- 2,000/4,500 bu/hr
- 40-degree incline capabilities
- 376 ft/min for gentle seed handling
- Clean-out door for ease of changing commodities or varieties
- Collapsible canvas hopper standard
- Galvanized hopper optional
- Available as portable model and custom-tailored for seed treatment system configurations

All 1610 EDGE Conveyors now feature the KSi Belt Self-Tensioning System.
