

# KS*i* Model 1212 Inclinator Series II and III Conveyors

Take advantage of KS*i* patent technology at an economical price with the KS*i* 1212 Inclinator Conveyor.

The KS*i* Model 1212 Inclinator conveyor mimics the KS*i*'s patented tube conveyor technology within a box conveyor design to provide all the benefits at a lower price point. The 1212 Series II conveyor features a crescent belt, while the 1212 Series III model moves material with a cleated belt.

- 12" crescent belt (Series II) or 12" cleated belt (Series III) with 12" galvanized box construction
- Curved belt pan inside box creates tube-like carrying functionality and efficiency
- Complete enclosed return
- Collapsible canvas hopper
- Electric or hydraulic drive
- Patented top-drive configuration
- 2,000 bu/hr
- 30-degree incline capabilities
- 376 ft/min for gentle seed handling
- Clean-out door for ease of changing commodities or varieties

*Note: Box-style conveyor stress/strength limitations only allow for 30-degree incline capabilities and a maximum conveyor length of 32'*

KS*i* 1212 Series II and III Inclinator

Economical Option for Seed Treatment System Integration

KS*i* 1212 Series II (Crescent Belt)

KS*i* 1212 Series III (Cleated Belt)
