

### Plain Sew Thread Clipper

## **NEW** Fischbein Dura Thread Clipper™

The new Fischbein Dura Thread Clipper™ improves sew system performance, eliminating downtime due to potential malfunction of the thread cutter.

Key features include:

- Innovative scissor blade design captures thread within the cutting arc – eliminates missed cuts between bags
- Robust design with long life blades made from special tool steel
- Cutting blades are easily accessed and set up – reducing maintenance and downtime

A retrofit kit is available to replace both the air thread pusher or the rotary knife on all 400 series plain sew systems.

Contact your local Fischbein Distributor to order now.

Note: Sew line must be within 3.75" from top of bag.  
Shown without guarding.

Specifications are subject to change without notice.
